+6289628746213 | maureenclst33@gmail.com | www.linkedin.com/in/maureencalistas | https://maureencalista.vercel.app/

West Jakarta, Indonesia

Computer Science undergraduate specializing in Intelligent Systems at BINUS University, with a strong interest in AI Engineering and Front-End Development. Experienced in developing machine learning and computer vision solutions using Python, as well as building web applications and user interfaces. Strong in problem-solving, leadership, and public speaking, with experience in academic projects, mentoring, and event work. Seeking an internship to apply technical knowledge, gain experience, and further develop skills in Information Technology.

EDUCATION

Universitas Bina Nusantara - West Jakarta — Sep 2024 - Sep 2028 (Expected)

Undergraduate Computer Science, 3.70/4.00

SMA Theresiana 1 Semarang - Semarang, Central Java — Jun 2021 - Mar 2024

Senior High School, Mathematical and Natural Science

PROJECTS

AgriYield - Machine Learning-Based Prediction of Paddy Yield — Jul 2026

- Built a Streamlit app for real-time paddy yield prediction using agricultural and environmental factors.
- Compared Linear Regression, KNN, and Random Forest; Random Forest was best (R^2 0.99, MAE 657.62 Kg).

Buginator - Bug Severity Classification Using NLP — Jul 2026

- Built a Streamlit app to classify GitHub issues as Critical or Non-Critical using text preprocessing and TF-IDF.
- Compared Logistic Regression, Naive Bayes, and SVM, achieving 93.74% accuracy and 0.94 F1-score with SVM.

Kovera - Book Cover Authenticity Using Feature Matching — Jul 2026

- Built a Computer Vision system using ORB and SIFT with Confidence-Based Ensemble Voting to verify book covers authenticity
- Implemented Automated Threshold Tuning per title: 92.67% accuracy, zero counterfeit covers classified as authentic.

Schola - Web-Based Scholarship Information System — Jul 2026

- Built a web platform with scholarship search/filter, online applications, document upload, and real-time status tracking.
- Developed an admin panel for listing and document management using Agile/Scrum, UML diagrams, and black-box testing.

SnapDriver - AI Drowsiness Detection for Safer Driving — May 2025

- Built a real-time MobileNetV2-based CNN-LSTM to classify Normal, Yawning, Talking, and Yawning+Talking from webcam video.
- Built a Streamlit app with voice alerts and Telegram alerts to emergency contacts.

EXPERIENCE

Beelingua BINUS University - West Jakarta — Jul 2026 - Present

Mentor

- Mentored 50 students in completing BINUS's mandatory English test through technical troubleshooting and progress tracking.
- Achieved a 76% completion rate, with students finishing one semester ahead of the standard deadline.

Brand Promotor - Jakarta — Jan 2025 - Present

Freelance

- Promoted brand awareness at large-scale events by engaging visitors, giving clear product explanations, and using soft-selling techniques to recommend tailored product solutions based on customer needs.
- Consistently met and exceeded brand-assigned sales targets.

SKILLS

- **Programming**: Python, JavaScript, TypeScript, PHP, HTML, CSS, C++
- **Libraries**: TensorFlow, OpenCV, Scikit-Learn, Pandas, NumPy, Matplotlib
- **Frameworks**: Next.Js, Laravel, Streamlit, React
- **Tools**: Git, GitHub, VSCode, Figma, Canva, Jupyter Notebook
- **Language**: Indonesian (native), English (active), Mandarin (learning)
- **Soft Skills**: Communication, Public Speaking, Teamwork, Problem Solving, Adaptability, Leadership
